Subject Index

Volume 34, July–December 1999

A

Absorption, chloride
Nitric Oxide–Induced Inhibition of Transport by Thick Ascending Limbs From Dahl Salt-Sensitive Rats, 508

Absorption, sodium
Nitric Oxide–Induced Inhibition of Transport by Thick Ascending Limbs From Dahl Salt-Sensitive Rats, 508

ACE inhibitor
Apoptosis During Regression of Cardiac Hypertrophy in Spontaneously Hypertensive Rats: Temporal Regulation and Spatial Heterogeneity, 229

Acetylcholine
Effect of Cholecalciferol Treatment on the Relaxant Responses of Spontaneously Hypertensive Rat Arteries to Acetylcholine, 897
Elevated Skeletal Muscle Blood Flow in Noncomplicated Type 1 Diabetes Mellitus: Role of Nitric Oxide and Sympathetic Tone, 1080
Endothelium-Derived Contracting Factor in Carotid Artery of Hypertensive Dahl Rats, 39

Acetylcysteine
N-Acetyl-L-Cysteine Enhances Interleukin-1β–Induced Nitric Oxide Synthase Expression, 574

α-actin
Carvedilol and Lacidipine Prevent Cardiac Hypertrophy and Endothelin-1 Gene Overexpression After Aortic Banding, 1197

Adducin
The Role of α-Adducin Polymorphism in Blood Pressure and Sodium Handling Regulation May Not Be Excluded by a Negative Association Study, 649

Adenyl cyclase
Impaired Prostaglandin E_2/Prostaglandin I_2 Receptor–G_s Protein Interactions in Isolated Renal Resistance Arterioles of Spontaneously Hypertensive Rats, 1134

Adenylyl cyclase
Impaired Atrial M_2-Cholinoceptor Function in Obesity-Related Hypertension, 1066

Adhesion molecules
Early Upregulation of Endothelial Adhesion Molecules in Obese Hypertensive Men, 568

Adolescence
Effects of Potassium on Blood Pressure in Salt-Sensitive and Salt-Resistant Black Adolescents, 181

β-adrenergic antagonist
Apoptosis During Regression of Cardiac Hypertrophy in Spontaneously Hypertensive Rats: Temporal Regulation and Spatial Heterogeneity, 229

Adrenergic receptor agonists
Long-Term Nitric Oxide Inhibition and Chronotropic Responses in Rat Isolated Right Atria, 802

Adrenergic receptors
Cardiovascular Effects of Clonidine-Like Drugs in Pithed Rabbits, 1012
Sympathoinhibitory Function of the α_{2A}-Adrenergic Receptor Subtype, 403

Adrenomedullin
Bioactivity and Interactions of Adrenomedullin and Brain Natriuretic Peptide in Patients With Heart Failure, 70
Orthostatic Stimuli Rapidly Change Plasma Adrenomedullin in Humans, 1147

Aging
The Aging Process Modifies the Distensibility of Elastic but not Muscular Arteries, 889
Aging, High Salt Intake, and Renal Dopaminergic Activity in Fischer 344 Rats, 666
Contribution of Stroke Volume to the Change in Pulse Pressure Pattern With Age, 808
Development of Nitric Oxide and Prostaglandin Mediation of Shear Stress–Induced Arteriolar Dilation With Aging and Hypertension, 1073
Effects of Aging and Antihypertensive Treatment on Aortic Internal Diameter in Spontaneously Hypertensive Rats, 207
Effects of Aging on Serum Ionized and Cytosolic Free Calcium: Relation to Hypertension and Diabetes, 902
Elastic Properties and Composition of the Aortic Wall in Old Spontaneously Hypertensive Rats, 415
Impaired Isoproterenol-Induced Hyperpolarization in Isolated Mesenteric Arteries of Aged Rats, 222
Influence of Age on Contractile Response to Insulin-Like Growth Factor 1 in Ventricular Myocytes From Spontaneously Hypertensive Rats, 1215
Long-Term Inhibition of Renin-Angiotensin System Sustains Memory Function in Aged Dahl Rats, 496

Albuminuria
Microalbuminuria and Transcapillary Albumin Leakage in Essential Hypertension, 491
Multiple Clinic and Home Blood Pressure Measurements Versus Ambulatory Blood Pressure Monitoring, 261

Aldosterone
A$_{-6}$G Variant of Angiotensinogen Gene and Aldosterone Levels in Hypertensives, 779
Altered Adrenal Sensitivity to Angiotensin II in Low-Renin Essential Hypertension, 388
Genetic Variants in the Epithelial Sodium Channel in Relation to Aldosterone and Potassium Excretion and Risk for Hypertension, 631
Genotype-Phenotype Relationships for the Renin-Angiotensin-Aldosterone System in a Normal Population, 423
Invited Editorial Commentary: Low-Renin and Nonmodulating Essential Hypertension, 395
Levels of Mineralocorticoids in Whites and Blacks, 315

Amlodipine
Contrasting Effects of Selective T- and L-Type Calcium Channel Blockade on Glomerular Damage in DOCA Hypertensive Rats, 673
Differential Effects of T- and L-Type Calcium Antagonists on Glomerular Dynamics in Spontaneously Hypertensive Rats, 273
Effects of Amlodipine on Tubulointerstitial Lesions in Normotensive Hyperoxaluric Rats, 854
Role of Nitric Oxide in the Control of Cardiac Oxygen Consumption in B_2-Kinin Receptor Knockout Mice, 563

Amyloid neuropathies
Role of Sympathetic Nervous System in Cyclosporine-Induced Rise in Blood Pressure, 102

Angioplasty, balloon
Kallikrein Gene Delivery Inhibits Vascular Smooth Muscle Cell Growth and Neointima Formation in the Rat Artery After Balloon Angioplasty, 164

Angiotensin
Angiotensin-Converting Enzyme Inhibition Modifies Angiotensin but Not Kinin Peptide Levels in Human Atrial Tissue, 171
Cardiovascular Effects of Angiotensin-(1–7) in Conscious Spontaneously Hypertensive Rats, 964
Effect of Angiotensin-(1-7) and Bradykinin in Patients With Heart Failure Treated With an ACE Inhibitor, 457

Angiotensin-(1–5)
Angiotensin-(1–7) Is a Modulator of the Human Renin-Angiotensin System, 296

Angiotensin-(1–7)
Angiotensin-(1–7) Is a Modulator of the Human Renin-Angiotensin System, 296
State-of-the-Art Lecture: Antiproliferative Actions of Angiotensin-(1–7) in Vascular Smooth Muscle, 950

Angiotensin-converting enzyme
Alternative Angiotensin II Formation in Rat Arteries Occurs Only at Very High Concentrations of Angiotensin I, 525

Angiotensin-(1–7) Is a Modulator of the Human Renin-Angiotensin System, 296
Angiotensin-Converting Enzyme Inhibition Modifies Angiotensin but Not Kinin Peptide Levels in Human Atrial Tissue, 171
Context-Dependent Associations of the ACE I/D Polymorphism With Blood Pressure, 773
Exercise Training-Induced Blood Pressure and Plasma Lipid Improvements in Hypertensives May Be Genotype Dependent, 18
Genetic Polymorphisms of the Renin-Angiotensin System and Atheromatous Renal Artery Stenosis, 1097
Genotype-Phenotype Relationships for the Renin-Angiotensin-Aldosterone System in a Normal Population, 423
Pathogenic Role of Oxidative Stress in Vascular Angiotensin-Converting Enzyme Activation in Long-Term Blockade of Nitric Oxide Synthesis in Rats, 546
Rat Angiotensin-Converting Enzyme Promoter Regulation by β-Adrenergics and cAMP in Endothelium, 31

Angiotensin-converting enzyme inhibitors
Cardiovascular Effects of Angiotensin-(1–7) in Conscious Spontaneously Hypertensive Rats, 964
Effect of Angiotensin-(1-7) and Bradykinin in Patients With Heart Failure Treated With an ACE Inhibitor, 457
Endothelial Nitric Oxide Gene Knockout Mice: Cardiac Phenotypes and the Effect of Angiotensin-Converting Enzyme Inhibitor on Myocardial Ischemia/Reperfusion Injury, 24
Long-Term Inhibition of Renin-Angiotensin System Sustains Memory Function in Aged Dahl Rats, 496
Prevention of Renal Damage by Angiotensin II Blockade, Accompanied by Increased Renal Hepatocyte Growth Factor in Experimental Hypertensive Rats, 279
Role of Nitric Oxide in the Control of Cardiac Oxygen Consumption in B_2-Kinin Receptor Knockout Mice, 563
State-of-the-Art Lecture: Statins and Blockers of the Renin-Angiotensin System: Vascular Protection Beyond Their Primary Mode of Action, 987

Angiotensin I
Angiotensin-(1–7) Is a Modulator of the Human Renin-Angiotensin System, 296

Angiotensin II
Activation of AT_2 Receptors by Endogenous Angiotensin II Is Involved in Flow-Induced Dilation in Rat Resistance Arteries, 659
Altered Adrenal Sensitivity to Angiotensin II in Low-Renin Essential Hypertension, 388
Angiotensin-(1–7) Is a Modulator of the Human Renin-Angiotensin System, 296
Angiotensin II Stimulates Gene Expression of Cardiac Insulin-Like Growth Factor I and Its Receptor Through Effects on Blood Pressure and Food Intake, 1053
Angiotensin II–Stimulated Induction of *sis*-Inducing Factor Is Mediated by Pertussis Toxin–Insensitive G_q Proteins in Cardiac Myocytes, 603
AT_1 Receptor Antagonism Reduces Endothelial Dysfunction and Intimal Thickening in Atherosclerotic Rabbits, 969
AT_2 Receptor Stimulation Enhances Antihypertensive Effect of AT_1 Receptor Antagonist in Hypertensive Rats, 1112
AT_1 Receptors Mediate Excitatory Inputs to Rostral Ventrolateral Medulla Pressor Neurons From Hypothalamus, 1301
Comparative Effect of Angiotensin-Converting Enzyme Inhibition and Angiotensin II Type 1 Receptor Antagonism on Plasma Fibrinolytic Balance in Humans, 285
Contribution of Extracellular Signal-Regulated Kinase to Angiotensin II–Induced Transforming Growth Factor-β1 Expression in Vascular Smooth Muscle Cells, 126
Genotype-Phenotype Relationships for the Renin-Angiotensin-Aldosterone System in a Normal Population, 423
In Vivo Study of AT_1 and AT_2 Angiotensin Receptors in Apoptosis in Rat Blood Vessels, 617
Induction of Interleukin-6 Expression by Angiotensin II in Rat Vascular Smooth Muscle Cells, 118
Inhibition of the Renin-Angiotensin System Upregulates Cyclooxygenase-2 Expression in the Macula Densa, 503
Matrix-Dependent Gene Expression of Egr-1 and PDGF A Regulate Angiotensin II–Induced Proliferation in Human Vascular Smooth Muscle Cells, 1141
Preactivated Peripheral Blood Monocytes in Patients With Essential Hypertension, 113
Prevention of Renal Damage by Angiotensin II Blockade, Accompanied by Increased Renal Hepatocyte Growth Factor in Experimental Hypertensive Rats, 279
Role of Angiotensin Receptor Subtypes in Mesenteric Vascular Proliferation and Hypertrophy, 408
State-of-the-Art Lecture: Antiproliferative Actions of Angiotensin-(1–7) in Vascular Smooth Muscle, 950
State-of-the-Art Lecture: Role of Angiotensin and Oxidative Stress in Essential Hypertension, 943
Torasemide Inhibits Angiotensin II–Induced Vasoconstriction and Intracellular Calcium Increase in the Aorta of Spontaneously Hypertensive Rats, 138

Angiotensin II receptor
Genetic Polymorphisms of the Renin-Angiotensin System and Atheromatous Renal Artery Stenosis, 1097

Angiotensinogen
$A_{-6}G$ Variant of Angiotensinogen Gene and Aldosterone Levels in Hypertensives, 779
Angiotensinogen Gene Polymorphism Near Transcription Start Site and Blood Pressure: Role of a T-to-C Transition at Intron I, 430
Elements of a Paracrine Tubular Renin-Angiotensin System Along the Entire Nephron, 1265
Genetic Polymorphisms of the Renin-Angiotensin System and Atheromatous Renal Artery Stenosis, 1097
Genotype-Phenotype Relationships for the Renin-Angiotensin-Aldosterone System in a Normal Population, 423

Anions
Effects of Superoxide on Signaling Pathways in Smooth Muscle Cells From Rats, 1247
Pathogenic Role of Oxidative Stress in Vascular Angiotensin-Converting Enzyme Activation in Long-Term Blockade of Nitric Oxide Synthesis in Rats, 546

ANP blockade
Kinin B2 Receptors Mediate Blockade of Atrial Natriuretic Peptide Natriuresis Induced by Glucose or Feeding in Fasted Rats, 826

Anti-inflammatory agents, nonsteroidal
Influence of Verapamil and Diclofenac on Leukocyte Migration in Rats, 997

Antihypertensive agents
Cardiovascular Effects of Clonidine-Like Drugs in Pithed Rabbits, 1012

Antioxidants
Effects of Glutathione on Red Blood Cell Intracellular Magnesium: Relation to Glucose Metabolism, 76
Effects of Vitamin E and Glutathione on Glucose Metabolism: Role of Magnesium, 1002
Nitric Oxide Synthase Expression in the Course of Lead-Induced Hypertension, 558

Antisense
Inhibition of the p53 Tumor Suppressor Gene Results in Growth of Human Aortic Vascular Smooth Muscle Cells: Potential Role of p53 in Regulation of Vascular Smooth Muscle Cell Growth, 192

Anxiety
Autonomic Modulation and QT Interval Dispersion in Hypertensive Subjects With Anxiety, 242

Aorta
Alternative Angiotensin II Formation in Rat Arteries Occurs Only at Very High Concentrations of Angiotensin I, 525
Different Mechanisms for Testosterone-Induced Relaxation of Aorta Between Normotensive and Spontaneously Hypertensive Rats, 1232
Effects of Aging and Antihypertensive Treatment on Aortic Internal Diameter in Spontaneously Hypertensive Rats, 207

Apolipoproteins E
Exercise Training-Induced Blood Pressure and Plasma Lipid Improvements in Hypertensives May Be Genotype Dependent, 18

Apoptosis
Apoptosis, Coronary Arterial Remodeling, and Myocardial Infarction After Nitric Oxide Inhibition in SHR, 609
In Vivo Study of AT_1 and AT_2 Angiotensin Receptors in Apoptosis in Rat Blood Vessels, 617

Inhibition of the p53 Tumor Suppressor Gene Results in Growth of Human Aortic Vascular Smooth Muscle Cells: Potential Role of p53 in Regulation of Vascular Smooth Muscle Cell Growth, 192

Arginine
L-Arginine Restores the Effect of Ouabain on Baroreceptor Activity and Prevents Hypertension, 729
Effects of L-Arginine on Atherogenesis and Endothelial Dysfunction due to Secondhand Smoke, 44

Arrhythmia
Respiratory Systolic Pressure Variability During Atrial Fibrillation and Sinus Rhythm, 1060

Arterial
Contribution of Stroke Volume to the Change in Pulse Pressure Pattern With Age, 808

Arterial pressure
Bioactivity and Interactions of Adrenomedullin and Brain Natriuretic Peptide in Patients With Heart Failure, 70
Heart Rate-Dependent Stiffening of Large Arteries in Intact and Sympathectomized Rats, 598

Arteries
Activation of AT_2 Receptors by Endogenous Angiotensin II Is Involved in Flow-Induced Dilation in Rat Resistance Arteries, 659
Angiotensin-(1–7) Is a Modulator of the Human Renin-Angiotensin System, 296
Attenuated In Vitro Coronary Arteriolar Vasorelaxation to Insulin-like Growth Factor I in Experimental Hypercholesterolemia, 89
cGMP-Mediated Negative-Feedback Regulation of Endothelial Nitric Oxide Synthase Expression by Nitric Oxide, 1237
Effect of Cholecalciferol Treatment on the Relaxant Responses of Spontaneously Hypertensive Rat Arteries to Acetylcholine, 897
Endothelium-Derived Contracting Factor in Carotid Artery of Hypertensive Dahl Rats, 39
Genistein Inhibits Pressure-Induced Expression of c-*fos* in Isolated Mesenteric Arteries, 132
Plasma Homocysteine, Aortic Stiffness, and Renal Function in Hypertensive Patients, 837
Proteoglycan Production by Vascular Smooth Muscle Cells From Resistance Arteries of Hypertensive Rats, 893
Sex Steroids, Insulin, and Arterial Stiffness in Women and Men, 590
The Aging Process Modifies the Distensibility of Elastic but not Muscular Arteries, 889

Arteries, rat
Kallikrein Gene Delivery Inhibits Vascular Smooth Muscle Cell Growth and Neointima Formation in the Rat Artery After Balloon Angioplasty, 164

Arteriolar injury
Differential Effects of T- and L-Type Calcium Antagonists on Glomerular Dynamics in Spontaneously Hypertensive Rats, 273

Arterioles
Cardiac Microvasculature in DOCA-Salt Hypertensive Rats: Effect of Endothelin ET_A Receptor Antagonism, 795
Development of Nitric Oxide and Prostaglandin Mediation of Shear Stress–Induced Arteriolar Dilation With Aging and Hypertension, 1073
Impaired Prostaglandin E_2/Prostaglandin I_2 Receptor–G, Protein Interactions in Isolated Renal Resistance Arterioles of Spontaneously Hypertensive Rats, 1134

Aspirin
Administration Time–Dependent Effects of Aspirin in Women at Differing Risk for Preeclampsia, 1016

AT_1 antagonist
Apoptosis During Regression of Cardiac Hypertrophy in Spontaneously Hypertensive Rats: Temporal Regulation and Spatial Heterogeneity, 229

Atherosclerosis
AT_1 Receptor Antagonism Reduces Endothelial Dysfunction and Intimal Thickening in Atherosclerotic Rabbits, 969
Blood Pressure and the Progression of Carotid Atherosclerosis in Middle-Aged Men, 51
Evaluation of Common Carotid Hemodynamic Forces: Relations With Wall Thickening, 217
In Vivo Renal Vascular and Tubular Function in Experimental Hypercholesterolemia, 859
State-of-the-Art Lecture: Statins and Blockers of the Renin-Angiotensin System: Vascular Protection Beyond Their Primary Mode of Action, 987

ATPase
Sodium Pump Inhibition and Regional Expression of Sodium Pump α-Isoforms in Lens, 1168

Atrial natriuretic factor
Kinin B2 Receptors Mediate Blockade of Atrial Natriuretic Peptide Natriuresis Induced by Glucose or Feeding in Fasted Rats, 826

Autonomic nervous system
Autonomic Modulation and QT Interval Dispersion in Hypertensive Subjects With Anxiety, 242
Effect of Magnesium Deficiency on Autonomic Circulatory Regulation in Conscious Rats, 247
Exercise Reverses Peripheral Insulin Resistance in Trained L-NAME–Hypertensive Rats, 768

Autoregulation
Cyclooxygenase-2 Modulates Afferent Arteriolar Responses to Increases in Pressure, 843

B

Baroreceptors
L-Arginine Restores the Effect of Ouabain on Baroreceptor Activity and Prevents Hypertension, 729
Commissural NTS Lesions and Cardiovascular Responses in Aortic Baroreceptor–Denervated Rats, 739
Exercise Reverses Peripheral Insulin Resistance in Trained L-NAME–Hypertensive Rats, 768

Baroreflex
Brain Renin-Angiotensin System and Ouabain-Induced Sympathetic Hyperactivity and Hypertension in Wistar Rats, 107
Digoxin Prevents Ouabain and High Salt Intake–Induced Hypertension in Rats With Sinoaortic Denervation, 733
Effect of Magnesium Deficiency on Autonomic Circulatory Regulation in Conscious Rats, 247
Orthostatic Stimuli Rapidly Change Plasma Adrenomedullin in Humans, 1147

Bicuculline
AT_1 Receptors Mediate Excitatory Inputs to Rostral Ventrolateral Medulla Pressor Neurons From Hypothalamus, 1301

Blacks
Altered Adrenal Sensitivity to Angiotensin II in Low-Renin Essential Hypertension, 388
Association Between the C825T Polymorphism of the G Protein β3-Subunit Gene and Hypertension in Blacks, 1193
Blood Pressure Increase With Impaired Glucose Tolerance in Young Adult American Blacks, 1086
Effects of Potassium on Blood Pressure in Salt-Sensitive and Salt-Resistant Black Adolescents, 181
Invited Editorial Commentary: Low-Renin and Nonmodulating Essential Hypertension, 395

Blood flow
Elevated Skeletal Muscle Blood Flow in Noncomplicated Type 1 Diabetes Mellitus: Role of Nitric Oxide and Sympathetic Tone, 1080
In Vivo Renal Vascular and Tubular Function in Experimental Hypercholesterolemia, 859

Blood flow velocity
Effects of Acute AV3V Lesions on Renal and Hindlimb Vasodilation Induced by Volume Expansion, 762
Plasma Homocysteine, Aortic Stiffness, and Renal Function in Hypertensive Patients, 837

Blood pressure
Administration Time–Dependent Effects of Aspirin in Women at Differing Risk for Preeclampsia, 1016
Ambulatory Physical Activity as a Determinant of Diurnal Blood Pressure Variation, 685
Angiotensinogen Gene Polymorphism Near Transcription Start Site and Blood Pressure: Role of a T-to-C Transition at Intron I, 430
AT_1 Receptors Mediate Excitatory Inputs to Rostral Ventrolateral Medulla Pressor Neurons From Hypothalamus, 1301

Blood Pressure and the Progression of Carotid Atherosclerosis in Middle-Aged Men, 51
Blood Pressure Increase With Impaired Glucose Tolerance in Young Adult American Blacks, 1086
Cardiopulmonary Reflex Impairment in Experimental Diabetes in Rats, 813
Cardiovascular Effects of Angiotensin-(1–7) in Conscious Spontaneously Hypertensive Rats, 964
Commissural NTS Lesions and Cardiovascular Responses in Aortic Baroreceptor–Denervated Rats, 739
Context-Dependent Associations of the ACE I/D Polymorphism With Blood Pressure, 773
Detection and Control of High Blood Pressure in the Community: Do We Need a Wake-Up Call? 466
Docosahexaenoic Acid but Not Eicosapentaenoic Acid Lowers Ambulatory Blood Pressure and Heart Rate in Humans, 253
Early Onset Salt-Sensitive Hypertension in Bradykinin B_2 Receptor Null Mice, 176
Effect of Dietary Patterns on Ambulatory Blood Pressure: Results From the Dietary Approaches to Stop Hypertension (DASH) Trial, 472
Effect of the HMG-CoA Reductase Inhibitors on Blood Pressure in Patients With Essential Hypertension and Primary Hypercholesterolemia, 1281
Effects of Acute AV3V Lesions on Renal and Hindlimb Vasodilation Induced by Volume Expansion, 762
Effects of Potassium on Blood Pressure in Salt-Sensitive and Salt-Resistant Black Adolescents, 181
Evidence for Linkage Between Essential Hypertension and a Putative Locus on Human Chromosome 17, 4
Gender Differences in Hypertension in Spontaneously Hypertensive Rats: Role of Androgens and Androgen Receptor, 920
Genistein Inhibits Pressure-Induced Expression of c-*fos* in Isolated Mesenteric Arteries, 132
Genotype-Phenotype Relationships for the Renin-Angiotensin-Aldosterone System in a Normal Population, 423
Glucagon Receptor Gene Mutation (Gly40Ser) in Human Essential Hypertension: The PEGASE Study, 15

Chemoreceptors
Commissural NTS Lesions and Cardiovascular Responses in Aortic Baroreceptor–Denervated Rats, 739
Cholecalciferol
Effect of Cholecalciferol Treatment on the Relaxant Responses of Spontaneously Hypertensive Rat Arteries to Acetylcholine, 897
Cholesterol
Effect of the HMG-CoA Reductase Inhibitors on Blood Pressure in Patients With Essential Hypertension and Primary Hypercholesterolemia, 1281
Effects of L-Arginine on Atherogenesis and Endothelial Dysfunction due to Secondhand Smoke, 44
Serum Calcium and Cardiovascular Risk Factors and Diseases: The Tromsø Study, 484
Chromaffin
Time-Dependent Effects of the Neuropeptide PACAP on Catecholamine Secretion: Stimulation and Desensitization, 1152
Chromogranin
Time-Dependent Effects of the Neuropeptide PACAP on Catecholamine Secretion: Stimulation and Desensitization, 1152
Chromosome 17
Evidence for Linkage Between Essential Hypertension and a Putative Locus on Human Chromosome 17, 4
Chromosome, rat, 1
Genetic Isolation of a Chromosome 1 Region Affecting Susceptibility to Hypertension-Induced Renal Damage in the Spontaneously Hypertensive Rat, 187
Chymase
Alternative Angiotensin II Formation in Rat Arteries Occurs Only at Very High Concentrations of Angiotensin I, 525
Angiotensin-(1–7) Is a Modulator of the Human Renin-Angiotensin System, 296
Cilazapril
Long-Term Inhibition of Renin-Angiotensin System Sustains Memory Function in Aged Dahl Rats, 496
Circadian rhythm
Administration Time–Dependent Effects of Aspirin in Women at Differing Risk for Preeclampsia, 1016
Coefficient, compliance
Sex Steroids, Insulin, and Arterial Stiffness in Women and Men, 590
Coefficient, distensibility
Sex Steroids, Insulin, and Arterial Stiffness in Women and Men, 590
Cognition
Long-Term Inhibition of Renin-Angiotensin System Sustains Memory Function in Aged Dahl Rats, 496
Cohort studies
Arterial Stiffness and the Development of Hypertension: The ARIC Study, 201
J-Shaped Relation Between Bleed Pressure and Stroke in Treated Hypertensives, 1181
Collagen
Elastic Properties and Composition of the Aortic Wall in Old Spontaneously Hypertensive Rats, 415

Complex traits
Congenic Substitution Mapping Excludes *Sa* as a Candidate Gene Locus for a Blood Pressure Quantitative Trait Locus on Rat Chromosome 1, 643
Compliance
Isolated Systolic Hypertension: Prognostic Information Provided by Pulse Pressure, 375
Constriction
Gender Differences in Ca^{2+} Entry Mechanisms of Vasoconstriction in Wistar-Kyoto and Spontaneously Hypertensive Rats, 931
Contraction
Enhanced Vascular Reactivity and Ca^{2+} Entry With Low-Salt Diet: Effect of Obesity, 882
Coronary disease
State-of-the-Art Lecture: Risk Mechanisms in Hypertensive Heart Disease, 782
State-of-the-Art Lecture: Role of Endothelin-1 in Hypertension, 876
State-of-the-Art Lecture: Statins and Blockers of the Renin-Angiotensin System: Vascular Protection Beyond Their Primary Mode of Action, 987
Cortisol
11β-Hydroxysteroid Dehydrogenase and Corticosteroid Action in Lyon Hypertensive Rats, 1123
Levels of Mineralocorticoids in Whites and Blacks, 315
Cross-sectional studies
Association and Linkage Analyses of Glucocorticoid Receptor Gene Markers in Essential Hypertension, 1186
Crosses, genetic
Congenic Substitution Mapping Excludes *Sa* as a Candidate Gene Locus for a Blood Pressure Quantitative Trait Locus on Rat Chromosome 1, 643
Cyclic AMP
Rat Angiotensin-Converting Enzyme Promoter Regulation by β-Adrenergics and cAMP in Endothelium, 31
Cyclic GMP
cGMP-Mediated Negative-Feedback Regulation of Endothelial Nitric Oxide Synthase Expression by Nitric Oxide, 1237
Nitric Oxide–Induced Inhibition of Transport by Thick Ascending Limbs From Dahl Salt-Sensitive Rats, 508
Cyclooxygenase
Cyclooxygenase-2 Inhibition Decreases Renin Content and Lowers Blood Pressure in a Model of Renovascular Hypertension, 96
Cyclooxygenase-2 Modulates Afferent Arteriolar Responses to Increases in Pressure, 843
Effect of Cyclooxygenase-2 Inhibition on Renal Function After Renal Ablation, 848
Cyclosporine
Role of Sympathetic Nervous System in Cyclosporine-Induced Rise in Blood Pressure, 102
Cysteine proteases
In Vivo Study of AT_1 and AT_2 Angiotensin Receptors in Apoptosis in Rat Blood Vessels, 617
Cytokines
N-Acetyl-L-Cysteine Enhances Interleukin-1β–Induced Nitric Oxide Synthase Expression, 574

D

Death, sudden, cardiac
Autonomic Modulation and QT Interval Dispersion in Hypertensive Subjects With Anxiety, 242
Denervation
Digoxin Prevents Ouabain and High Salt Intake–Induced Hypertension in Rats With Sinoaortic Denervation, 733
Renin Activity and Blood Pressure in Response to Chronic Episodic Hypoxia, 309
Role of Renal Nerves in the Stimulation of the Renin System by Reduced Renal Arterial Pressure, 1101
Deoxycorticosterone
Levels of Mineralocorticoids in Whites and Blacks, 315
Deoxycorticosterone salt
Blood Pressure and Small Arteries in DOCA-Salt–Treated Genetically AVP-Deficient Rats: Role of Endothelin, 907
Desensitization
Time-Dependent Effects of the Neuropeptide PACAP on Catecholamine Secretion: Stimulation and Desensitization, 1152
Diabetes mellitus
Blood Pressure Increase With Impaired Glucose Tolerance in Young Adult American Blacks, 1086
Cardiopulmonary Reflex Impairment in Experimental Diabetes in Rats, 813
Effects of Aging on Serum Ionized and Cytosolic Free Calcium: Relation to Hypertension and Diabetes, 902
Elevated Skeletal Muscle Blood Flow in Noncomplicated Type 1 Diabetes Mellitus: Role of Nitric Oxide and Sympathetic Tone, 1080
Diadenosine polyphosphates
Identification of Diadenosine Hexaphosphate in Human Erythrocytes, 872
Diastole
Insulin and Diastolic Dysfunction in Lean and Obese Hypertensives: Genetic Influence, 1208
Diet
Effect of Dietary Patterns on Ambulatory Blood Pressure: Results From the Dietary Approaches to Stop Hypertension (DASH) Trial, 472
Enhanced Vascular Reactivity and Ca^{2+} Entry With Low-Salt Diet: Effect of Obesity, 882
Hypotensive Effect of Low-Fat, High-Carbohydrate Diet Can Be Independent of Changes in Plasma Insulin Concentrations, 580
Impaired Atrial M_2-Cholinoceptor Function in Obesity-Related Hypertension, 1066
Differentiation
The Nature of Intracrine Peptide Hormone Action, 534
Digoxin
Digoxin Prevents Ouabain and High Salt Intake–Induced Hypertension in Rats With Sinoaortic Denervation, 733
Left Ventricular Mass, Stroke Volume, and Ouabain-Like Factor in Essential Hypertension, 450
Dilation
Development of Nitric Oxide and Prostaglandin Mediation of Shear Stress–Induced Arteriolar Dilation With Aging and Hypertension, 1073
Distensibility
Arterial Stiffness and the Development of Hypertension: The ARIC Study, 201
Diuretics
Randomized Double-Blind Comparison of a Calcium Antagonist and a Diuretic in Elderly Hypertensives, 1129
Docosahexaenoic acid
Docosahexaenoic Acid but Not Eicosapentaenoic Acid Lowers Ambulatory Blood Pressure and Heart Rate in Humans, 253
Dopamine
Aging, High Salt Intake, and Renal Dopaminergic Activity in Fischer 344 Rats, 666
In Vivo Evidence That Endogenous Dopamine Modulates Sympathetic Activity in Man, 398
Doxorubicin
Doxorubicin Selectively Inhibits Brain Versus Atrial Natriuretic Peptide Gene Expression in Cultured Neonatal Rat Myocytes, 1223
Drug therapy
Effects of Transdermal 17β-Estradiol on Left Ventricular Anatomy and Performance in Hypertensive Women, 1041
J-Shaped Relation Between Blood Pressure and Stroke in Treated Hypertensives, 1181

E

Early growth response-1 gene
Matrix-Dependent Gene Expression of Egr-1 and PDGF A Regulate Angiotensin II–Induced Proliferation in Human Vascular Smooth Muscle Cells, 1141

Echocardiography
Ambulatory Blood Pressure and Metabolic Abnormalities in Hypertensive Subjects With Inappropriately High Left Ventricular Mass, 1032
Effects of Transdermal 17β-Estradiol on Left Ventricular Anatomy and Performance in Hypertensive Women, 1041

Cardiac Microvasculature in DOCA-Salt Hypertensive Rats: Effect of Endothelin ET_A Receptor Antagonism, 795
Carvedilol and Lacidipine Prevent Cardiac Hypertrophy and Endothelin-1 Gene Overexpression After Aortic Banding, 1197
Contrasting Effects of Selective T- and L-Type Calcium Channel Blockade on Glomerular Damage in DOCA Hypertensive Rats, 673
Elastic Properties and Composition of the Aortic Wall in Old Spontaneously Hypertensive Rats, 415
Endothelial Function in Hypertension: The Role of Superoxide Anion, 539
Importance of Glycinergic and Glutamatergic Synapses Within the Rostral Ventrolateral Medulla for Blood Pressure Regulation in Conscious Rats, 752
Rostral Ventrolateral Medulla: A Source of Sympathetic Activation in Rats Subjected to Long-Term Treatment With L-NAME, 744

Hypertension, genetic
Association Between the C825T Polymorphism of the G Protein β3-Subunit Gene and Hypertension in Blacks, 1193
Context-Dependent Associations of the ACE I/D Polymorphism With Blood Pressure, 773
Genetic, Biochemical, and Clinical Studies of Patients With A328V or R213C Mutations in 11βHSD2 Causing Apparent Mineralocorticoid Excess, 435
Genome Scan for Blood Pressure Loci in Mice, 625
The Role of α-Adducin Polymorphism in Blood Pressure and Sodium Handling Regulation May Not Be Excluded by a Negative Association Study, 649

Hypertension, isolated systolic
Impaired Renal Adaptation to Stress in the Elderly With Isolated Systolic Hypertension, 1106

Hypertension, lead-induced
Nitric Oxide Synthase Expression in the Course of Lead-Induced Hypertension, 558

Hypertension, mild
Blood Pressure and the Progression of Carotid Atherosclerosis in Middle-Aged Men, 51
Effects of Transdermal 17β-Estradiol on Left Ventricular Anatomy and Performance in Hypertensive Women, 1041

Hypertension, obesity
Defective Dopamine Receptor Function in Proximal Tubules of Obese Zucker Rats, 1091

Hypertension, pregnancy
Administration Time–Dependent Effects of Aspirin in Women at Differing Risk for Preeclampsia, 1016
Ca^{2+}-Insensitive Vascular Protein Kinase C During Pregnancy and NOS Inhibition, 924

Hypertension, renal
Cyclooxygenase-2 Inhibition Decreases Renin Content and Lowers Blood Pressure in a Model of Renovascular Hypertension, 96
Genetic Isolation of a Chromosome 1 Region Affecting Susceptibility to Hypertension-Induced Renal Damage in the Spontaneously Hypertensive Rat, 187
Increased Availability of Nitric Oxide Leads to Enhanced Nitric Oxide Dependency of Tubuloglomerular Feedback in the Contralateral Kidney of Rats With 2-Kidney, 1-Clip Goldblatt Hypertension, 679
Prevention of Renal Damage by Angiotensin II Blockade, Accompanied by Increased Renal Hepatocyte Growth Factor in Experimental Hypertensive Rats, 279

Hypertension, renovascular
Plasma Homocysteine, Aortic Stiffness, and Renal Function in Hypertensive Patients, 837

Hypertension, secondary
State-of-the-Art Lecture: Sympathetic Activation in the Pathogenesis of Hypertension and Progression of Organ Damage, 724

Hypertension, sodium-dependent
Endothelium-Derived Contracting Factor in Carotid Artery of Hypertensive Dahl Rats, 39
Genetic Variants in the Epithelial Sodium Channel in Relation to Aldosterone and Potassium Excretion and Risk for Hypertension, 631
Nitric Oxide Synthase Isotype Expression in Salt-Sensitive and Salt-Resistant Dahl Rats, 552
Sympathoinhibitory Function of the α_{2A}-Adrenergic Receptor Subtype, 403

Hypertension, systemic
Renin Activity and Blood Pressure in Response to Chronic Episodic Hypoxia, 309

Hypertension, white coat
Ambulatory Blood Pressure and Metabolic Abnormalities in Hypertensive Subjects With Inappropriately High Left Ventricular Mass, 1032
Ambulatory Blood Pressure: Normality and Comparison With Other Measurements, 818
Diagnosis of White Coat Hypertension by Ambulatory Blood Pressure Monitoring, 267

Hypertrophy
Angiotensin II Stimulates Gene Expression of Cardiac Insulin-Like Growth Factor I and Its Receptor Through Effects on Blood Pressure and Food Intake, 1053
Blood Pressure and Small Arteries in DOCA-Salt–Treated Genetically AVP-Deficient Rats: Role of Endothelin, 907
Doxorubicin Selectively Inhibits Brain Versus Atrial Natriuretic Peptide Gene Expression in Cultured Neonatal Rat Myocytes, 1223
Effects of Transdermal 17β-Estradiol on Left Ventricular Anatomy and Performance in Hypertensive Women, 1041
Insulin and Diastolic Dysfunction in Lean and Obese Hypertensives: Genetic Influence, 1208

Late Treatment With Ramipril Increases Survival in Old Spontaneously Hypertensive Rats, 291
State-of-the-Art Lecture: Sympathetic Activation in the Pathogenesis of Hypertension and Progression of Organ Damage, 724
Hypertrophy, left ventricular
Ambulatory Blood Pressure and Metabolic Abnormalities in Hypertensive Subjects With Inappropriately High Left Ventricular Mass, 1032
Autonomic Modulation and QT Interval Dispersion in Hypertensive Subjects With Anxiety, 242
Cardiac Consequences of Prolonged Exposure to an Isolated Increase in Aortic Stiffness, 63
Carvedilol and Lacidipine Prevent Cardiac Hypertrophy and Endothelin-1 Gene Overexpression After Aortic Banding, 1197
Hypothalamus
Adenovirus-Mediated Gene Delivery to Hypothalamic Magnocellular Neurons in Mice, 756
Hypoxia
Renin Activity and Blood Pressure in Response to Chronic Episodic Hypoxia, 309

I

Immunohistochemistry
Angiotensin II Stimulates Gene Expression of Cardiac Insulin-Like Growth Factor I and Its Receptor Through Effects on Blood Pressure and Food Intake, 1053
In Memoriam
Harriet Pearson Dustan, 162
Jay Michael Sullivan: 1936–1999, 2
Inflammation
Salicylate Inhibition of Extracellular Signal-Regulated Kinases and Inducible Nitric Oxide Synthase, 1259
Insulin
Attenuated In Vitro Coronary Arteriolar Vasorelaxation to Insulin-like Growth Factor I in Experimental Hypercholesterolemia, 89
Blood Pressure Increase With Impaired Glucose Tolerance in Young Adult American Blacks, 1086
Effects of Sympathectomy and Nitric Oxide Synthase Inhibition on Vascular Actions of Insulin in Humans, 586

Ultrasonography
Blood Pressure and the Progression of Carotid Atherosclerosis in Middle-Aged Men, 51
Heart Rate-Dependent Stiffening of Large Arteries in Intact and Sympathectomized Rats, 598
Uric acid, serum
Serum Uric Acid and Cardiovascular Events in Successfully Treated Hypertensive Patients, 144

V

Vascular diseases
Plasma Homocysteine, Aortic Stiffness, and Renal Function in Hypertensive Patients, 837
Vascular hypertrophy
Ang II–Stimulated Superoxide Production Is Mediated via Phospholipase D in Human Vascular Smooth Muscle Cells, 976
State-of-the-Art Lecture: Role of Endothelin-1 in Hypertension, 876
Vascular proliferation
Role of Angiotensin Receptor Subtypes in Mesenteric Vascular Proliferation and Hypertrophy, 408
State-of-the-Art Lecture: Antiproliferative Actions of Angiotensin-(1–7) in Vascular Smooth Muscle, 950
Vascular resistance
Activation of the Na^+-H^+ Exchanger Modulates Angiotensin II–Stimulated Na^+-Dependent Mg^{2+} Transport in Vascular Smooth Muscle Cells in Genetic Hypertension, 442
Blood Pressure and Small Arteries in DOCA-Salt–Treated Genetically AVP-Deficient Rats: Role of Endothelin, 907
Vasoactivity
Identification of Diadenosine Hexaphosphate in Human Erythrocytes, 872
Vasoconstriction
Activation of the Na^+-H^+ Exchanger Modulates Angiotensin II–Stimulated Na^+-Dependent Mg^{2+} Transport in Vascular Smooth Muscle Cells in Genetic Hypertension, 442
Epoxyeicosatrienoic Acids Increase Intracellular Calcium Concentration in Vascular Smooth Muscle Cells, 1242
Impaired Prostaglandin E_2/Prostaglandin I_2 Receptor–G_i Protein Interactions in Isolated Renal Resistance Arterioles of Spontaneously Hypertensive Rats, 1134
Vasodilation
AT_2 Receptor Stimulation Enhances Antihypertensive Effect of AT_1 Receptor Antagonist in Hypertensive Rats, 1112
Effects of Sympathectomy and Nitric Oxide Synthase Inhibition on Vascular Actions of Insulin in Humans, 586
Vasodilatory Effects of Troglitazone Improve Blood Pressure at Rest and During Mental Stress in Type 2 Diabetes Mellitus, 83
Vasomotor system
Rostral Ventrolateral Medulla: A Source of Sympathetic Activation in Rats Subjected to Long-Term Treatment With L-NAME, 744
Vasomotor tone
Importance of Glycinergic and Glutamatergic Synapses Within the Rostral Ventrolateral Medulla for Blood Pressure Regulation in Conscious Rats, 752
Vasopressins
Adenovirus-Mediated Gene Delivery to Hypothalamic Magnocellular Neurons in Mice, 756
Blood Pressure and Small Arteries in DOCA-Salt–Treated Genetically AVP-Deficient Rats: Role of Endothelin, 907
Effect of Estrogen Replacement on Vasoconstrictor Responses in Rat Mesenteric Arteries, 1117
Effects of the Nonpeptide V_1 Vasopressin Receptor Antagonist SR49059 in Hypertensive Patients, 1293
Vasorelaxation
Epoxyeicosatrienoic Acids Increase Intracellular Calcium Concentration in Vascular Smooth Muscle Cells, 1242
Ventricular fibrosis
Apoptosis, Coronary Arterial Remodeling, and Myocardial Infarction After Nitric Oxide Inhibition in SHR, 609
Cardiac Consequences of Prolonged Exposure to an Isolated Increase in Aortic Stiffness, 63
Ventricular function
Hemodynamic Function at Rest, During Acute Stress, and in the Field: Predictors of Cardiac Structure and Function 2 Years Later in Youth, 1026
Multiple Clinic and Home Blood Pressure Measurements Versus Ambulatory Blood Pressure Monitoring, 261

Ventrolateral medulla
Importance of Glycinergic and Glutamatergic Synapses Within the Rostral Ventrolateral Medulla for Blood Pressure Regulation in Conscious Rats, 752
Verapamil
Influence of Verapamil and Diclofenac on Leukocyte Migration in Rats, 997
Vitamins
Nitric Oxide Synthase Expression in the Course of Lead-Induced Hypertension, 558

W

Wall shear stress
Development of Nitric Oxide and Prostaglandin Mediation of Shear Stress–Induced Arteriolar Dilation With Aging and Hypertension, 1073
Water-electrolyte balance
Effects of Acute AV3V Lesions on Renal and Hindlimb Vasodilation Induced by Volume Expansion, 762
Whites
Association and Linkage Analyses of Glucocorticoid Receptor Gene Markers in Essential Hypertension, 1186

Y

Youth
Hemodynamic Function at Rest, During Acute Stress, and in the Field: Predictors of Cardiac Structure and Function 2 Years Later in Youth, 1026
